

ANDREW MECCHI

Westminster, MD • data.at.large@gmail.com • <https://andrew-mecchi.github.io/>

Professional Summary

Motivated, dedicated, and adaptable Data Analyst and Full-Stack Developer with a robust foundation in SQL query execution, Python, database validation and optimization, and user-friendly visual interface design. Proven track record of translating data-driven, complex technical concepts into actionable insights and tools for executive leadership and non-technical stakeholders. Possess a passionate, insatiable drive to learn and continue development of new skills, and contribute as a strong, cohesive team member.

Technical Skills

Languages & Frameworks:	SQL, PostgreSQL, Python, AI Gem Development and Optimization ETL Optimization, HTML/CSS, Google App Scripts, JavaScript
Databases & Querying:	SQL, PostgreSQL, Amazon Web Services (AWS) Athena/Red Shift, Google BigQuery, Master Data Management (MDM)
Reporting & BI:	Power BI, Tableau, Amazon QuickSight, Python Visual Libraries
Tools & Methodologies:	Data Governance, GitHub, Agile Methodologies, Technical Writing (SOPs)

Technical and Professional Projects

Personal Portfolio & Front-End Web Applications | <https://andrew-mecchi.github.io/>

- Designed, developed, and deployed user-friendly portfolio website utilizing **HTML/CSS, Markdown, and YAML**
- Portfolio highlights examples of to **data analysis notebooks and dashboard visualization projects**
- Focused on creating clean, highly accessible user interfaces built for target audiences aligning with operational needs for clear stakeholder tools.

Completed and Ongoing Initiatives and Enterprises | Maryland Department of Human Services

- Drafted Department of Human Services (DHS) Data Governance Policy
- Designed, developed, and implemented multiple executive dashboards for Child Support Administration Leadership and stakeholders (public facing dashboard expected delivery Summer 2026)
- Oversee and validate data warehouse transition to Amazon Web Service RedShift, Athena, and QuickSight
- Engineered and launched autonomous workflow for executive dashboard focusing on company-wide Artificial Intelligence Adoption through Google BigQuery, Google App Scripts, Google Sheets, and Power BI
- Data Office representative to oversee Master Data Management Project – analyze match and merge rules and assist with project management for development of PII Override API solution
- Completed data reconciliation project for Office of Procurement - rectifying misaligned Vendors, Purchase Orders, and leveraged Natural Language Processing to assist with identifying additional vendors

Professional Experience

Maryland Department of Human Services | November 2024 – Present

Data Analyst — Chief Data Office /Child Support Administration

- **Write and execute complex SQL queries** to support ad-hoc workflows, operational auditing, and critical data requests for administrative personnel.
- **Design, test, and maintain autonomous executive dashboards and user-friendly interfaces** utilized directly by the Chief Information Officer (CIO), Chief Data Officer (CDO), and Child Support Administration Executive Leadership.
- **Collaborate cross-functionally** with developers, data scientists, project management team, and the Chief Data Officer to align system requirements with master data management and data governance initiatives.
- Take complete ownership of data reporting requests, ensure accurate data pipelines, enforce stringent data quality workflow, and ensure deliverables are consistent and of the highest quality.

Carroll County Public Schools | September 2022 – October 2024

Instructional Assistant, Behavioral Support

- **Collaborated daily with non-technical stakeholders** (teachers, administrative staff, and mental health team) to communicate actionable behavioral insights and tracking strategies.
- Designed operational workflows for tracking behavioral metrics, demonstrating strong problem-solving and adaptive communication skills in a high-energy environment.

Pinnacle CT Labs | May 2021 - November 2021

Microbiology Analyst

- Performed microbiological **quality control testing and assays** of medical cannabis in accordance with state policies.
- **Designed and performed validation assessments** for new microbiological assays and laboratory techniques to maintain compliance with the Maryland Medical Marijuana Commission.
- Authored and updated Standard Operating Procedures (SOPs) for microbiological testing and best practices.

Carroll County Public Schools | April 2017 - January 2020

Substitute Teacher

- Instructed students using lesson plans for Elementary, Middle, and High Schools throughout Carroll County.
- Managed classroom sizes of 25-30 students and assisted subject matter challenges for students with Individual Education Plans.

Leidos Biomedical Research Inc. | November 2009 – March 2014

Research Associate I

- Co-designed automated software scripting workflows for the Freedom EVO 100 platform to maximize pipeline efficiency and data collection throughput.
- Assumed complete operational leadership of the laboratory environment within three months of hire, demonstrating strong self-motivation and troubleshooting capabilities.
- Authored detailed Standard Operating Procedures (SOPs) for multiple extraction systems, streamlining team training and internal software tool alignment.

SAIC-Frederick (Aerotek) | November 2006 – November 2009

Research Technician

- Processed whole human blood into component fractions for clinical research and studies.
- Sampled data entry into Biological Specimen Inventory for multiple studies.
- Maintained legacy documentation for all clinical data.

Education

Master of Science in Data Analytics

Western Governors University | February 2024

Bachelor of Science in Biology

Minor: General Business

Villanova University | May 2006
